EDUCATION

Carleton University

Bachelor of Computer Science, Cybersecurity stream

Core GPA: 11.0/12.0

Expected Apr. 2029

Ottawa, ON

Algonquin College

Computer Programming Diploma

Relevant coursework: Object-oriented programming, data structures, relational databases, SQL, full-stack web development, team projects

Apr. 2023

Ottawa, ON

EXPERIENCE

Software Developer

Promote Media, Inc. (Promote.fun)

Apr. 2026 – Jul. 2026

Remote

- Contributed to a one-month launch of a creator clipping platform that later reached approximately 100,000 users.
- Integrated Clerk authentication, Cloudflare R2 storage, and Resend email into a React, TypeScript, and Convex application.
- Implemented creator USDC withdrawals using Solana Kit.
- Coordinated feature delivery in Jira, investigated errors with Sentry, and analyzed user activity with PostHog.
- Used Claude to develop features, reviewing and testing generated code before release.

PROJECTS

MoneyPal | Personal Finance Web App | GitHub | Live App

2026

- Built simulated transfers between users with recipient validation and wallet balance checks.
- Kept transaction history and budget totals consistent when users deleted transfers.
- Implemented monthly budgets, scheduled rollovers, overspend alerts, and spending history with Convex.
- Used Claude to implement features, then reviewed the code, tested workflows, and resolved integration issues.

Pet Connect | Mobile Social App | GitHub

2023

- Built a React Native app for pet profiles, photo sharing, and social posts.
- Added a timeline feed, likes, comments, and pet search using Apollo GraphQL, Express, and MySQL.
- Integrated Auth0 and JWT authentication for registration and login.

Manage.sys | Store Management System | GitHub

2022

- Built a store management web app with React, Spring Boot, and PostgreSQL.
- Implemented APIs to create, retrieve, update, and delete store and employee records.
- Developed account registration screens and connected store and employee forms to the APIs.

TECHNICAL SKILLS

Software Development |

JavaScript, TypeScript, Java, React, Node.js, Spring Boot, REST APIs, GraphQL

Databases |

SQL, PostgreSQL, MySQL, MongoDB, Redis

DevOps & Infrastructure |

Git, Docker, GitHub Actions, CI/CD, Linux, Nginx, Cloudflare
