EDUCATION

Carleton University

Bachelor of Computer Science, Cybersecurity stream
Core GPA: 11.0/12.0

Expected Apr. 2029
Ottawa, ON

Algonquin College

Computer Programming Diploma
Relevant coursework: Object-oriented programming, data structures, relational databases, SQL, full-stack web development, team projects

Apr. 2023
Ottawa, ON

EXPERIENCE

Software Developer

Promote Media, Inc. (Promote.fun)

Apr. 2026 - Jul. 2026
Remote

- Helped build a creator clipping platform from scratch and launch it in roughly one month; it later grew to approximately 100,000 users.
- Built application features and infrastructure with React, TypeScript, Convex, Clerk, Cloudflare R2, and Resend.
- Worked with engineers to break down features and coordinate delivery through Jira.
- Built creator payout functionality to support USDC withdrawals.
- Used Sentry and PostHog to investigate production errors and user activity.

PROJECTS

OTPGuard | Chrome Extension & Companion Website | GitHub | Live App

2026

- Built a Chrome extension that finds recent Gmail verification codes and fills them only after the user chooses Fill.
- Developed the extension and companion website with TypeScript, React, Next.js, and Convex, including guided setup and website permissions.
- Kept Gmail tokens, messages, and codes inside the extension, with local preferences and activity controls.

MoneyPal | Personal Finance Web App | GitHub | Live App

2026

- Built a personal finance app with simulated transfers between users, validating recipients and wallet balances before processing each transfer.
- Kept transaction history and budget totals in sync when transfers were deleted.
- Developed monthly budgets, scheduled rollovers, overspend alerts, and spending history using Convex.

Pet Connect | Mobile Social App | GitHub

2023

- Built a React Native social app where pet owners could create profiles and share photos and posts.
- Developed a timeline feed with likes, comments, and pet search using Apollo GraphQL, Express, and MySQL.
- Integrated Auth0 and JWT to support account registration and login.

TECHNICAL SKILLS

Programming Languages |

TypeScript, JavaScript, Java, Python, SQL

Frameworks |

React, Next.js, React Native, Spring Boot, Express

Backend Development |

Node.js, REST APIs, GraphQL, Convex, Clerk

Databases |

PostgreSQL, MySQL, Oracle, SQLite, Supabase

DevOps & Tools |

Git, Docker, GitHub Actions, Linux, Cloudflare, Vercel, Jira, Postman
